DETAILED ACTION

- 1. This communication is in response to Applicant's arguments filed on 09/26/2007.
- 2. Claims 1-23 remain pending.

ALLOWABLE SUBJECT MATTER

3. Claims 18-23 are allowed over the prior art of record.

Claim Objections

4. Claims 9-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-8 are rejected under 35 U.S.C. 103 (a) as being unpatentable over the newly found prior Hertz Frederick S. M. (U.S. PG. Pub 2003/0037041; 12/09/1996) in view of Walker et al (U.S. Pat. No. 6,249,772).

Application/Control Number:

09/802,278 Art Unit: 3621

As per claims 1-8 Hertz 041" substantially discloses a system/method for automatic

determination of customized and promotions or advertisements (which is readable as

Applicant's claimed invention wherein said a method for enabling targeted information

retrieval while protecting consumer privacy) comprising:

providing a plurality of elements of information (see., abstract, specifically target

objects, [0002], [0014], [0015], and [0018]);

specifying a negotiant function designed to accept a plurality of elements of data

associated an information request as output, said information request designating at

least one element of information to present to the consumer from among a plurality of

elements of information (see., abstract, [0014], [0018], [0019], [0109], specifically

[0205], negotiate the release of user-specific information and credentials from proxy

server); and

distributing the negotiant function (see., abstract, [0014], [0015], [0018], [0205]). Hertz

041" fails to explicitly disclose the step of distributing the negotiation function to a

consumer for execution by said consumer. However, Walker discloses a system/method

wherein a consumer negotiates a price for a selected product, the consumer is

assured that he will actually receive the product (see., abstract, col 10, lines 35-45). It

would have been obvious to a person of ordinary skill in the art at the time the invention

was made to modify the privacy-protected targeting system of Hertz 041" by including

the limitation detailed above as taught by Walker because this would allow consumer to

significantly affect the price of the products of the manufacturer.

Art Unit: 3621

7. Claims 1-8 are rejected under 35 U.S.C. 103 (a) as being unpatentable over the newly found prior Hertz Frederick S. M. et al (U.S. Pat. No. 5,754,939; 05/19/1999) in view of Walker et al (U.S. Pat. No. 6,249,772).

As per claims 1-8 Hertz 939" substantially discloses an inventive concept of customizing electronic identification of desirable object (which is readable as Applicant's claimed invention wherein said a method for enabling targeted information retrieval while protecting consumer privacy) comprising:

providing a plurality of elements of information (see., abstract, specifically target objects, col 1-col18);

specifying a negotiant function designed to accept a plurality of elements of data associated an information request as output, said information request designating at least one element of information to present to the consumer from among a plurality of elements of information (see., abstract, col 1-col18, negotiate the release of userspecific information and credentials from proxy server); and

distributing the negotiant function (see., abstract, [0014], [0015], [0018], [0205]). Hertz 939" fails to explicitly disclose the step of distributing the negotiation function to a consumer for execution by said consumer. However, Walker discloses a system/method wherein a consumer negotiates a price for a selected product, the consumer is assured that he will actually receive the product (see., abstract, col 10, lines 35-45). It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the privacy-protected targeting system of Hertz 939" by including 09/802,278

Art Unit: 3621

the limitation detailed above as taught by Walker because this would allow consumer to significantly affect the price of the products of the manufacturer.

RESPONSETO ARGUMENTS

8. Applicant's arguments filed on 09/26/2007 have been fully considered but they moot in view of new ground (s) of rejection.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The examiner can normally be reached on 6:30 to 5:00. Patents and hoteling.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Fischer can be reached on 571 272 6779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
